    My website to show off my knowledge of computer science.

Skills

Languages: C++, C#, HTML, CSS, JavaScript   **Source Control:** Git

Experience

Autoliv – Production Control   March 2018 - current

- Independently work to keep the lines running in the most efficient way.
- Build pallets with correct part numbers to be shipped out over seas.
- Supervise a crew on the weekends and solve any problems that arise.

UPS – Package Handler   September 2017 – March 2018

- Loaded packages of various weights and sizes to fill up trailers and unit load devices most efficiently and organized as possible.
- I read area codes and labels to determine where the packages should be sent.
- After being assigned multiple trailers to load for the night I prioritized which trailers to move to when things got busy; however, I helped my coworkers with their own trailers while it was slow.
